**ROOPENET**

## PE Monofilament Hollow Braid

### Structure: Hollow Braided

Features:  
Floats  
Economical  
Does not mildew, rot, or deteriorate even if stored wet  
Splices easily  
Minimal stretch design for durability

Applications:  
Pulling wires. Life ring throw ropes. Buoys. Floating lines. Tie-downs. Watersport. Sand Crowd control barriers

Hollow braid polypropylene rope is a strong lightweight rope that floats in water, great abrasion resistance, spliceable and will not kink.

This rope has excellent resistance to oil marine growth and most common chemicals. Designed to not rot or deteriorate this rope has good abrasion and UV characteristics. Good dielectric properties.

Available colors: white, orange, black

Available packages: Hank

| Item    | Diameter | Length | Color  | Breaking load |
|---------|----------|--------|--------|---------------|
| 2240705 | 6MM      | 30M    | Orange | 300KG         |
